

**NO MATTER WHICH TEAM
YOU'RE ROOTING FOR,
WE'RE ALL IN THIS FIGHT
AGAINST COVID-19 TOGETHER.**

**Download the SlowCOVIDNC
Exposure Notification app to help
slow the spread of COVID-19.**

The image shows a mockup of the SlowCOVIDNC app interface. The central screen displays the 'Welcome to SlowCOVIDNC' message, identifying it as the official Exposure Notification App of the North Carolina Department of Health and Human Services (NCDHHS). It explains that to use the app, users must enable Exposure Notifications and Bluetooth on their device. Below this text are two large teal buttons: 'HOW IT WORKS' and 'ENABLE'. At the bottom of the central screen are links for 'Privacy Checklist' and 'Privacy Policy'. To the left, a side panel titled 'Anonymous Tokens' shows an illustration of two people and explains that the app uses random letters and numbers every 10-20 minutes, which are never linked to user locations. To the right, another side panel shows a hand holding a smartphone with a lock icon, with text explaining that tokens are generated every few minutes and are never linked to a user's location or name. On the far right, there are two QR codes for downloading the app from 'Google Play' and the 'App Store'.
